DETAILED ACTION

Information Disclosure Statement

The information disclosure statement(s) submitted on 10 July 2008 and 7 November 2008 have been considered by the Examiner.

Allowable Subject Matter

Applicant's response filed 7 November 2008 has been fully considered and is persuasive. Claims 1, 4, 6-15, 18-20, 23, 24, and 27-42 are allowed in view of the prior art of record.

Claim Rejections - 35 USC § 112, second paragraph

Applicant's amendment has overcome the rejection of claim 20 under 35 U.S.C. § 112, second paragraph. See page 13 of Applicant's remarks.

Claim Rejections - 35 USC § 102

Applicant's arguments with respect to claims 12 and 13 rejected under 35 U.S.C. § 102(b) as anticipated by Waelti et al(WO 01/38820) have been considered and found persuasive. See pages 14-18 of Applicant's remarks. At column 6, lines 45-51 of the Waelti et al translation(6,806,963) defines the first path 11-31-35-33-36-32-37 as substantially equal to the second path 11-31-34-32-39. The delay in the first path compared to second path would also be substantially zero.

Claim Rejections - 35 USC § 103

Applicant's arguments with respect to claims 14, 15, and 18-20 rejected under 35 U.S.C. § 103(a) as unpatentable over Waelti et al(WO 01/38820) have been

considered and found persuasive. See pages 18-20 of Applicant's remarks. In Waelti et al the arrangement(29) in the sample arm does include a path length difference but fails to produce a path length delay between the two radiations because they travel equal path lengths.

The following is an examiner's statement of reasons for allowance:

With regard to claims 1, 4, 6-11, 23, 24, 27-31, and 37-42; see the Examiner's statement of allowable subject matter in the non-final rejection dated 17 December 2007.

With regard to claim 12, the prior art of record fails to teach wherein the delay of a path of the first radiation compared to a path of the second radiation is at least 500 μm in air; in combination with the remaining limitations of claim 12. Claim 13 is dependent from claim 12 and therefor also includes the allowed subject matter.

With regard to claim 14, the prior art of record fails to teach a sample arm receiving the electromagnetic radiation, the sample arm including an arrangement which is configured to produce at least two radiations from the electromagnetic radiation so as to irradiate the sample, and to delay a first radiation of the at least two radiations with respect to a second radiation of the at least two radiations, wherein the arrangement has at least one of: a first optical section with a refractive index of at least 1.5, the first section being structured to propagate the at least two radiations, a second section which has silicon, the second section being structured to

propagate the at least two radiations; in combination with the remaining limitations of claim 14. Claims 15, and 18-20 are dependent from claim 14 and therefor also include the allowed subject matter.

With regard to claim 32, the prior art of record fails to teach a third arrangement configured to generate data corresponding to an amount of a ranging depth within the sample associated with the second arrangement, wherein a difference between the path lengths of the first and second radiations is equal or greater than the ranging depth; in combination with the remaining limitations of claim 32. Claims 33-36 are dependent from claim 32 and therefor also include the allowed subject matter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
